Easley Hammer reflected that he thought it was a mistake to hide the Chevrons, [24] while Lemessurier said Stubbins had rejected his idea by the exposed Chevrons. [27] [91] The gallons were screwed between the two hundred joints; As built, they raised a serious structural danger, which led to the engineering crisis of the Citicorp center. [91] [106] As a result, 2 steel plates welded in thickness (5.1 cm) were installed on each joint in 1978. [91] [107] INTERIOR POBBY LOBBY The tower contains approximately 2.70,000 m2) of profitable space. [1] The Office Annex to the East contains approximately 2.3ã £ - 10^6 square feet (120,000 m2) of space. [24] According to the city planning department, the building has a gross floor of 1,654,020 square feet (153,663 m2), [4], while according to the skyscraper center, the building has 1,578,883 square feet (146,683.0 m2). [1] The main entrance lobby of the 601 Lexington Avenue base is in the middle of the Lexington Avenue forehead, through a catwalk that provides entrance to the church of San Pedro. P. 520. P. Archive of the original on April 3, 2021. igic in line. BISNOW. Subtracting the cost of \$ 5 million. [138] [140] [142] for 1971, Hugh Stubbins & Associates were hired to develop plans for a large building in the city block, and the church of San Pedro had hired Edward. Larrabee Barnes to represent their design interests. [14] The Stubbins company was relatively inexperienced in the design of high -rise buildings. [13] The New York Times characterized the site as an "annex" to the main building of First National City Bank in 399 Park Avenue. [14] [138] The Congregation of the Church of San Pedro voted in May 1971 to approve the sale and build a new structure in the same site, [143] [144] and moved in early 1973 to a temporary location in the central presbyterian church. [145] By July 1973, the land acquisition was practically complete, [146] although the last package was not acquired until November 1975, when the lot was purchased at 884 Third Avenue. [138] The acquisition cost was \$ 40 million, which made the city block most expensive on Earth. [19] [141] The one to be demolished. [13] Construction In addition to what became the final design, Stubbins and his associates studied at least six alternative proposals for the tower, with different designs of the roof. [28] The first plans also required to install strides under each corner. [98] This plan was discarded because Northwest's piloting would extend to the Lutheran Church of San Pedro, and the Church wanted its sanctuary to be structurally separated. [70] [98] The plans for the tower were disclosed publicly on July 24, 1973. [17] [141] The plans reques a 910-foot tower (280 m) -tall called Citicorp Center, high above the level of The street in the 112 feet mosquacos (34 m). pp. 31 â, -37. Aluminum was polished to reflect the heat of sunlight. [7] [30] [31] The triangular roof of 601 Lexington Avenue rises 160 (49 m) About superior history and faces the south, tilting in a 45 degree number. [25] [28] [35] [C] [C] The official plans were announced in 1973, the architects had had the intention that the ceiling was terraces for apartments, [39] [40] but the plan of planning of the city of New York would not approve a change of zoning to allow that use. [27] [29] [40] Then, the architects turned the roof to the south [38] [41] to accommodate solar flat plate collectors that could produce hot water, which would be used to dehumidify the air and reduce the energy of cooling. months for the installation of said system. [28] [43] [44] Subsequently, the system was discarded, either by low savings, [45] [46] [47] Refinement of mechanical systems, [31] or disputes with the supplier. [7] even after the solar collector plans were discarded, either by low savings, [45] [46] [47] Refinement of mechanical systems, [31] or disputes with the supplier. [7] even after the solar collector plans were discarded, either by low savings, [45] [46] [47] Refinement of mechanical systems and include the solar collector plans were discarded, either by low savings, [45] [46] [47] Refinement of mechanical systems and include the solar collector plans were discarded, either by low savings, [45] [46] [47] Refinement of mechanical systems. that proliferate in the city center." [48] [49] This made Citicorp Center the first postmodern skyscraper whose ceiling was designed and Citibank sponsored a four -year solar panel test. [7] [51] View of external spaces from the square, a large 12 -foot (3.7 m) square was built below the street level together with the center of Citicorp and designed by the landscape architect Hideo Sasaki . [52] The square was included under the resolution of zoning to include open space in front of their buildings. While many developers took advantage of the "bonus", the New York City planning commission found in 1975 that many of these places went from "shadow and sad places" to "prohibited and frankly hostile." [54] [55] In response, the urban design of the planning commission of the city city It had been formed in 1967 to determine how to improve the design of the square, [52] [56] influencing the decision of the commission to modify the laws of zoning in 1975, [52] [55] 601 Lexington Avenue Square was finished in 1973 before these rules change of rules, such as an outdoor square, a covered pedestrian ceremony and a game room that crosses the city block. [52] [57] The square has a 6,000 square feet (560 m2). [58] Its presence allowed the tower to be designed with a maximum floor of 18: 1, more highly highly specified for the creep. [27] The square is accessed by a set of stairs that extend northeast from the corner of Lexington Avenue and 53rd Street. [52] [59] On the southern side of the square there is an entrance to the lexington avenue/51st Street. [60] [61] This subway entry replaces two stairs from the street, which were demolished to give way to the Citicorp center. [52] The north side of the square contains the entrance to the church of San Pedro and the East side contains an entrance to the lower lobby. [62] During the construction of the square, the developers collaborated with the numerous public agencies with a participation in the project, including the metropolitan transport authority, which operated the subway stake. [33] The square, the indoor shopping clothing and the sidewalks initially contain border brick cobbles. ^ A B C D E Goldberger, Paul (December 5, 1977). ^ A B C D Nash, Eric (2005). ^ "Citicorp center honest for its use of aluminum". Fluorescent light bars on the ceiling, manufactured by Joseph Loring & Associates, were equipped with glass shields to extend artificial light more efficiently, requiring less lighting accessories. [30] [117] Although solar collectors on the roof were not installed, the other characteristics allowed the building to use 42 percent less energy compared to a
regular office building of the same size. [97] However, during the summer, the building used a conventional air conditioning system, which compensated the savings of the heat definition facade. [94] Citicorp Center was the first skyscraper of the city to present a tuned mass shock absorber (TMD). [24] [105] Located within the mechanic space on the
roof, the TMD is designed to counteract balancing movement to fifty percent. [91] [121] [122] The equipment weighs 400 short tons (360 long tons; 360 t) and includes a concrete block that measures 30 by 30 for 6 feet (9.1 by 9.1 by 1.8 m). [20] [24] [38] The concrete block is found in an oil pool
inside a steel plate and has two spring mechanisms, one to counteract the North-South and East-West movement. Archive of the original on February 26, 2021. For the purchase, Eric Hadar had organized a first mortgage of $ 525 million from Deutsche Bank and a Prã © Stamo The interviews of $ 150 million from the Singapore government. [173]
[175] The sale was then delayed that Boston Properties offered to buy the participation of Dai -ich. [176] Eric Hadar's company, Allied Partners, along with Boston Properties, finally finished their purchase of both both April units. [177] [178] The building cost $ 755 million, including closing costs and taxes, and Citigroup moved to 399 Park Avenue
[114] [179] One of the piles was reinforced structurally after the attacks of September 11, [100] [101] and protective bollards were installed on the sidewalk. [180] Boston Properties began to change the name of
the building as "601 Lexington Avenue". [183] A new Lexington Avenue. [108] [184] In addition, a ramp was installed on 53rd Street to Lexington Avenue. [108] [184] In addition, a ramp was installed on 53rd Street and an É;rea of reception was added to the northern entrance of the Church of San Pedro. [114] The name
change entered into force in 2010. [114] [185] [186] Boston Properties was also considering selling the rights of the building. [187] For 2013, Citigroup only occupied three stories in 601 Lexington Avenue, along with a proportional participation
in the building of the Atlantic Wharf and 100 Federal Street office in Boston, Norges Bank Investment Management for a combined $ 1.5 billion. [189] [180] In mid -2016, the preservation commission of monuments of New York City (LPC) proposed to protect twelve buildings in East Midtown, including 601 Lexington Avenue, before the
 changes proposed to the zoning of the sine. [191] At that time, Boston Properties was contemplating building renovations; The company presented alteration plans for the square that Julio, [58] and was vacating the space in the office annex. [192] On December 6, 2016, the LPC designated 601 Lexington Avenue as City milestone. [3] [193] [194] The
designation made 601 Lexington Avenue the younger milestone of the city at that time. [193] The same month, Boston Properties announced plans to renew the annex of the office, which be renamed 159 EAST 53rd Street. [195] [196] Little after, in March 2017, Gensler revealed his design for a renewed entrance square and a new atrium space. [197]
[198] That June, he began work in the square and the original source was demolished, despite being part of the historical designation. [63] All space in the 2019, Anna Castellani firm Meal Hall of 10,000 square feet (930 m2)
at the base of 601 Lexington Avenue. [201] [202] IMPACT Critical Reception of the base during the construction of the base during the base during the construction of the base during the base dur
Louise Huxtable criticized the design in the New York Times, saying that the tower "has no romanticism or structural rationalism, but, instead, it seems to have been Thoroughly invented with a tortured libic through a series of pragmatic and static commitments." [24] [203] As the building was completed, hexitable took a less hard tone for the
building, saying that he contained a "clear desire for designed quality" despite the inconveniences of the shape and roof. [84] [204] A writer from The New York Daily News said: "Put this in Cleveland and would be the eighth wonder of the world. Poststol publication. (PDF). "The well -known skyscraper sold to a little known family." Driscoll had studied vacancies rates to the fourteen "main offices buildings" while Citicorp Center was developing. [154] The first tenants moved to the building in April 1977. [39] In August, the building was rented of 96 percent [111] This high occupation rate was despite the fact that
the space in the building was He rented at an average rate high than in other neighborhood buildings. [38] [97] Stubbins gave an opening speech in which the building described as a "skyscrapers for people." [18] [69] The project was
the first to be completed under the lumbito of the Mayors from its establishment an earlier. [113] At the time of the building, the retail market complex at the base was almost totally rented. [143] more than three hundred retailers had submitted applications to operate within the space. [111] Most
of the space was rented by the retail furniture retailers Conran's, who occupied 40,000 square feet (3,700 m2), [155] but some of the other retailers included restaurants that served in the kitchen of several countries.
directions in Midtown. [38] [39] The remaining stories were occupied by a variety of companies, including those of the Church of San Pedro were installed. [156] The Church of San Pedro was
dedicated in December 1977, [66] [157] and the Drivilla Chapel was dedicated separately the same month. [158] Initially, the inclined roof of the tower created an ice problem during the winter, since snow and ice would slide down the roof to the sidewalk. [36] In addition, the purchasing contest was initially used slightly and largely unknown to the
public. [159] The Plaza in Lexington Avenue opened in July 1978. [18] In the first years of the complex, the Church of San Pedro found fiscal fiction due to the high costs of public services, so as inflation and The lack of investment experience, despite the fact that the Church earned money to rent some of the other spaces that it owned in

to divide its offices between the buildings. [170] The market shopping atrium fell into poor condition after the termination of the purchasing contest, designed by Gwathmey Siegel & Associates Architects. [114] [113] Brick cobblestones were
replaced by terrazo, new signs were installed outside each store, and characteristics of circulation were reorganized such as the placement of mechanical stairs. [114] [172] The shopping dress was called stores in Citicorp Center and the Barnes & Noble bookstore was named as the presenter, taking 40,000 square feet (3,700 m2). [113] The
21st century at the end of 2000, the Dai -ich Corredor, Jones Lang Lasalle, had placed the entire Citigroup center for sale. [173] [174] Dai -ich organized with Citigroup, his of condominium units. [174] Richard and Eric D. "The Citicorp center reflects the synthesis of architecture." Vol. 59, No. 2. OCLCã ¢ 722452921
Archive of the original on June 24, 2021. May 29, 1995. 1995. Whyte particularly praised the structure as juxtaposing "many elements at the right time", particularly the external square and the sidewalk. [7] The building was also praised by out -of -city publications in New York City. [84] Baltimore's sun described the building as it contained
 "simplicity [...] that goes beyond sophistication", [26] while the London observer called it "a unique contribution to the horizon of the horizon of the horizon of the horizon of the East side ". [84] Awards and use as an acono at the end of the Citicorp Center, received several architectural awards. "The A.I.A. awards go to Grand and the Modest." ^ A B Hellman 1974,
